SUMMARY

- ✓ 3.7 years of hands on experience in Web Application Development as a Developer which includes Requirement Gathering, Development, Code Review, Testing, Production Release.
- ✓ Hands on experience in Core Java and Golang.
- ✓ Working experience in Spring Boot.
- ✓ Hands on experience in RESTful APIs development and Integration.
- ✓ Basic understanding of Frontend Web Development.
- ✓ Working experience in debugging and bug fixing.
- ✓ Working closely with TL, BA, PM on Sprint basis in Agile Methodology.

TECHNICAL SKILLS

Programming Languages: Java, Golang

Frontend Technologies: HTML, JavaScript, jQuery, AJAX

Backend Technologies: Spring Boot, Hibernate, REST APIs, MySQL

Tools & Libraries: Eclipse, IntelliJ IDEA, Maven, Postman, Docker, SVN, Git, JIRA

Platforms: Windows, Linux

WORK EXPERIENCE

Software Engineer at KrypC

Sept. 2017 - Present

- Worked on DAS, Asset Tracking applications using Spring Boot specifically dealing with request and response from UI to DB, writing Controller, Util, POJO classes, parsing JSON response and consuming REST APIs of KrypCore application using RestTemplate.
- Implemented BDD Testing of APIs in Golang using Ginkgo Test Framework for KrypCore.
- Written REST APIs in Golang using Gorilla Mux URL router for KrypCore Dashboard.
- Written code in Golang for dynamically creating Docker compose YAML file for configuration.
- Used Elastic Stack to analyze Docker container logs in Kibana using Filebeat.
- Used basic Docker commands for refreshing containers data and logs.
- Used HTML, JavaScript, jQuery, AJAX and Google Maps Geocoding API as part of basic UI.

Technologies: HTML, JavaScript, Java, Spring Boot, Golang, REST APIs, Docker, Git, Linux.

Software Developer at Flyin.com

Feb 2017 - Sept. 2017

- Worked on Hotels Booking Engine project in Travel Domain.
- Specifically, APIs integration between Sales channels (Web & Mobile) and various CRS.
- Integration includes City Based Search, Hotel Id Search, BookingInfoRequest, BookingRequest, CancellationPolicyRequest, Currency Conversion for different geographical locations, Seasonality, Markup on room price, Offers, Extra amenities.
- Written business logic in Core Java according to business requirement and used Mule ESB components for extracting data from database, consuming REST APIs from different CRS using HTTP connector, framing request and response for different CRS, tested APIs using Postman and written basic SQL queries.
- Worked on Makkah App Service which was launched during Festival in UAE providing sales and offers on room price and Extranet In-House product which other vendors were using for pricing.
- Worked with cross geographical teams located in India, Riyadh, Poland on Sprint Basis in Agile Methodology using JIRA as project management tool.

Technologies: Java, Mule ESB, REST APIs, Oracle, Postman, SVN, JIRA, Windows.

Software Engineer at Zensar Technologies

Sept. 2014 - Feb. 2017

- Worked on Deluxe Enhancement project in E-commerce Domain.
- Project consisted of two consumer facing and one customer agent facing web applications.
- Specifically, modules include Account Profile, Shipping Page, Order Confirmation Mail, Abandoned Order, Item out of stock, Web Analytics (Tealeaf tagging of HTML elements and setting Adobe Omniture variables based on request), deploying static contents using CMS for web pages various placeholder.
- Basically involved in middle layer development and UI development of web applications.
- Written business logic in Core Java, implemented JSPs and basic SQL queries for different requirements referring to wireframes, bug fixing, debugging.
- Worked with cross geographical teams located in India, USA on Sprint Basis in Agile Methodology using JIRA as project management tool.

Technologies: HTML, JavaScript, JSP, Java, Oracle ATG, Oracle, JBoss, SVN, JIRA, Windows.

EDUCATION

B.Tech in Information Technology, Punjab Technical University. (7.5 CGPA)
